

(README) To-Do List Web Application

A clean and responsive to-do list web app made with **HTML**, **CSS**, and **JavaScript**, allowing users to manage daily tasks effectively.

◆ Features

-  Add new tasks
 -  Mark tasks as completed
 -  Delete tasks
 -  Optional: Save tasks in `localStorage`
 -  Fully responsive on all screen sizes
-

Technologies Used

- **HTML** – Structure of the app
 - **CSS** – Styling and layout
 - **JavaScript** – Interactivity and logic
-

File Overview

- `index.html` – Page layout
 - `style.css` – UI styling
 - `script.js` – Task logic and interactivity
-

How to Use

1. Open `index.html` in your browser
2. Add tasks using the input field and button
3. Mark completed or delete them as needed
4. Enjoy your task organizing experience!
